EDUCATION

Aditya University (Formerly Aditya Engineering College and Tech)

B.Tech in Computer Science and Engineering (CGPA: 8.43/10)

Andhra Pradesh, India

2025 – 2028 (Expected)

Aditya Polytechnic College

Diploma in Computer Engineering (CGPA: 8.75/10)

Andhra Pradesh, India

2022 – 2025

SKILLS

Languages: C, C++, Python, JavaScript, HTML, CSS, PHP

Backend & Database: Spring Boot, Node.js, REST APIs, MySQL, Supabase

Frontend & UI: React, Bootstrap, Qt, QML, Frontend UI Design

Tools & Creative Suite: Git, GitHub, Postman, Adobe Photoshop, Canva Pro, Video Editing

Core Concepts: DSA, Object-Oriented Programming, DBMS, Operating Systems (OS), Computer Networks

EXPERIENCE

Full Stack Development Trainee

Development Track

Drive Ready

2026 - 2027

- Selected through the Technical Hub coding and interview process for Full Stack Development training.
- Focused on React and Spring Boot as part of the full-stack development track.

Frontend Developer

Software Interfaces

Bhairav Robotics

- Designed and developed responsive frontend user interfaces for software applications.
- Worked with UML-based planning and design concepts for application development.
- Integrated Python-based workflows into application functionality and improved interface usability.

Web Development Intern

Project-Based Internship

Ava Intern

Nov 2024 – May 2025

- Successfully completed a rigorous 6-month internship focused on Full Stack Web Development.
- Developed and tested web applications using HTML, CSS, JavaScript, and PHP.
- Collaborated with team members on development, testing, and troubleshooting tasks.

PROJECTS

GymPilot | Gym Membership Management Web App (🌐 [Live Demo](#))

Aug 2026

- Developed a membership management platform featuring local storage persistence and dynamic alert logic for expirations.
- Integrated Supabase backend for secure database authentication and CRUD operations.

Student Management System | Academic Tracking App (🌐 [Live Demo](#))

Jul 2026 – Aug 2026

- Built a web-based academic system featuring theme switching, local storage persistence, and dynamic table rendering.
- Published and deployed live via GitHub Pages.

SafeLink | Emergency Alert System (In Development)

2026

- Engineered a conceptual response bridge supporting automated fallback switching between internet protocols and offline SMS.

Network Ghost | Security Diagnostic Tool (Concept Stage)

2026

- Designing an advanced networking utility for deep packet analysis, secure simulation, and node tracking.
